Inspiring Women To Be Leaders

Sweet Briar's first-year enrollment increases by over 40%

It was only three years ago that Sweet Briar College announced that it would be closing after more than a century of preparing women to be leaders in the modern world. The school was suffering a steep decline in enrollment and experiencing “insurmountable financial challenges,” according to its administration.

But the students, faculty and alumnae rallied to save their college and the decision to close was reversed. In fact, Sweet Briar is ready to leave that near-closure storyline in the past, according to its president, Meredith Woo.

“It’s an uphill battle to let the word out that we never really did close, and that Sweet Briar is thriving,” she recently told The New York Times.

Evidence of the college’s impressive turnaround certainly can be seen with its incoming first-year class for the 2018-19 academic year, which:

- Increased by 42% from the previous year, with a total of 129 new students enrolling for the fall 2018 compared to 91 in fall 2017.
- Included students from 23 states and five countries outside the U.S., including China, Ethiopia, India, Mexico and Russia.
- Had a higher mean grade point average and SAT combined test scores compared to previous years.

“Not only is the quantity of students increasing, but also — judging by their aptitude test scores and grade point averages — more academically gifted students are making Sweet Briar their college choice,” Woo says.

Sweet Briar partnered with Capture to connect with prospective students and increase enrollment. Capture was involved in all aspects of the admissions process, from suspect status to enrollment.

“It’s an uphill battle to let the word out that we never really did close, and that Sweet Briar is thriving.”

behavior on Sweet Briar's website, so admissions counselors could identify which pages on the site prospective students were visiting and target relevant messages and content to them in real time.

Sweet Briar also used Capture's direct mail services as part of an integrated approach to increase the college's brand awareness and encourage responses and conversions across channels. Capture offers full-service design, production and mailing services.

The college also used Capture's Digital Display Advertising (DDA), a multi-channel approach to deliver customized display ads to prospects by tailoring the content and creative of each ad for specific audience segments. These display ads promote brand awareness, increase engagement and synchronously boost the effectiveness of all other marketing campaigns.

Finally, Sweet Briar's counselors used Capture's predictive modelling products — APPLY, AID and ENROLL — to identify which prospective students to target. The only comprehensive predictive engine on the market today, the products use machine learning and nonlinear analytics set to accurately predict not only who will apply but also who will enroll.

Capture's predictive models are 98% accurate in predicting both applicant and enrollment predictions across Capture partners. With this kind of accuracy,

colleges and universities are able to confidently make the decisions that efficiently focus marketing time and resources while successfully shaping their enrollment class. Accurate models pay for themselves by helping institutions eliminate wasted time, money and resources in their recruiting and marketing efforts.

"Not only is the quantity of students increasing, but also — judging by their aptitude test scores and grade point averages — more academically gifted students are making Sweet Briar their college choice."
